REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art has failed to suggest either singly or in combination a novel articulated seat. The applicant has disclosed the use of a seat plate having a top side, a front side, a rear side, a right side, a left side, and an underside; first and second linear gear racks; a rocker base having an upper side; first and second side rails, wherein each of the side rails have an arcuate side. The applicant shows first and second arcuate gear portions, each disposed on the arcuate side of one of the first and second side rails, wherein first and second arcuate gear portions are in intermeshing relationship to the first and second linear gear racks, respectively. The applicant has further shown a seat back pivotally connected to the seat plate; first and second back links pivotally connected to the seat back and to the rocker base; whereby during rocking movements of the seating mechanism, the first and second linear gear racks provide a moving tangent relative to the first and second arcuate gear portions such that the rocking movements occur over a moving fulcrum.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference Nos. 1,840,679, 834,670, 346,311 and German Patent DE3439917 show features of the claimed invention.
